

2021 END OF YEAR RESULTS PATIENT SURVEYS

Customer Survey from January - December 2021

Ninety-eight percent (98%) of **260 veteran patients** who freely participated in ThermaZone's product survey stated that they would recommend ThermaZone to a friend.

Non-opioid Pain Management

*Photo provided by patient

“-----
In the past, I have resorted to prescription pain medications to manage my severe headaches and upper neck pain. **With ThermaZone, relief is almost immediate, and without the negative effects of medication.** I am extremely satisfied with the device and thankful to the Veteran Affairs Medical Providers for their support in finding alternative methods for treatment.

-----”

"ThermaZone Improved My Healing Process 10-fold!"

“-----
I went through a painful period of surgery and rehab for almost 2 years. I feel that ThermaZone improved my healing process 10-fold as to what it would have been without it. I was able to get off the opioids after 6 months. Otherwise, I would have needed them the entire 2 years. The ThermaZone device gave me pain relief each day and the hope to keep moving forward.
